

SAFETY DATA SHEET FULLGEAR HYP EP MT 90

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

SECTION 1: Identification of	f the substance/mixture and of the company/undertaking
1.1. Product identifier	
Product name	FULLGEAR HYP EP MT 90
1.2. Relevant identified uses	s of the substance or mixture and uses advised against
Identified uses	Automotive Gear oil. For specific application advice see appropriate Technical Data Sheet.
1.3. Details of the supplier o	f the safety data sheet
Supplier	OPET FUCHS MADENİ YAĞ SAN. ve TİC. A.Ş. Atatürk Organize Sanayi Bölgesi 10006 Sok. No:12 35620 Çiğli/İZMİR Tel: +90 232 376 78 38 Fax: +90 232 376 78 39
1.4. Emergency telephone r	number
Emergency telephone	UZEM (National Poison Consultancy Center): 114 Emergency Health Service:112
SECTION 2: Hazards identit	fication
2.1. Classification of the sub	ostance or mixture
Classification (EC 1272/200	
Physical hazards	Not Classified
Health hazards	Skin Sens. 1 - H317
Environmental hazards	Aquatic Chronic 2 - H411
2.2. Label elements Pictogram	
Signal word	Warning
Hazard statements	H317 May cause an allergic skin reaction. H411 Toxic to aquatic life with long lasting effects.

Precautionary statements	 P261 Avoid breathing vapour/ spray. P272 Contaminated work clothing should not be allowed out of the workplace. P273 Avoid release to the environment. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P302+P352 IF ON SKIN: Wash with plenty of water. P321 Specific treatment (see medical advice on this label). P333+P313 If skin irritation or rash occurs: Get medical advice/ attention. P362+P364 Take off contaminated clothing and wash it before reuse. P391 Collect spillage. P501 Dispose of contents/ container in accordance with national regulations.
Contains	Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14- tert-alkyl

2.3. Other hazards

By handling of mineral oil products and chemical products no particular hazard is known when normal precautions (item 7) and personal protective equipment (item 8) are kept.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Reaction products of 4-methyl-2-pentanol and diphosphorus		1-5%
pentasulfide, propoxylated, ester		
pentaoxide, and salted by amine CAS number: —	EC number: 931-384-6	
CAS humber. —	EC humber: 931-364-0	
Classification		
Acute Tox. 4 - H302		
Eye Dam. 1 - H318		
Skin Sens. 1 - H317		
Aquatic Chronic 2 - H411		
Oleylamine; (Z)-octadec-9-enyla	mine	<1%
CAS number: 112-90-3	EC number: 204-015-5	
M factor (Acute) = 10	M factor (Chronic) = 10	
Classification		
Acute Tox. 4 - H302		
Skin Corr. 1B - H314		
Eye Dam. 1 - H318		
STOT SE 3 - H335		
STOT RE 2 - H373		
Asp. Tox. 1 - H304		
Aquatic Acute 1 - H400		
Aquatic Chronic 1 - H410		

The full text for all hazard statements is displayed in Section 16.

Composition commentsNote L: The product contain special performance additives and base oils which are
considered to be severely refined and not considered to be carcinogenic. All of the base oils in
the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract
by the IP 346 test.

SECTION 4: First aid measures

4.1. Description of first aid measures

<u></u>	
General information	Change clothes and shoes contaminated or soaked by product. Never put rags contaminated by product into cloth-pockets. Get medical attention if any discomfort continues. Not expected to give rise to an acute hazard under normal conditions of use.
Inhalation	Remove affected person from source of contamination and immediately take outside to fresh air. Consult a doctor if any discomfort continues.
Ingestion	IF SWALLOWED: Rinse mouth thoroughly with water. Get medical attention immediately. Do not induce vomiting unless under the direction of medical personnel. Never give anything by mouth to an unconscious person. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Show this Safety Data Sheet to the medical personnel.
Skin contact	Remove affected person from source of contamination. Remove contaminated clothing immediately and wash skin with soap and water. Continue to rinse for at least 15 minutes. Brush off loose particles from skin. If adhesive bonding occurs, do not force skin apart. Get medical attention.
Eye contact	Do not rub eye. Remove any contact lenses and open eyelids wide apart. Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes. Get medical attention if symptoms are severe or persist after washing.
Protection of first aiders	Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves.
4.2. Most important symptoms	and effects, both acute and delayed
Inhalation	No specific symptoms known.
Ingestion	No specific symptoms known.
Skin contact	No specific symptoms known.
Eye contact	No specific symptoms known.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	Symptomatic treatment should be applied. In case of excessive inhalation of the product vapor may lead to lung inflammation (chemical pneumonitis). Dermatitis may result from prolonged or repeated exposure.
Specific treatments	Treat symptomatically.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	Use Film-Making Foam Concentrate (A.F.F.F.) to extinguish the burning product. If not available, extinguish with dry chemical powder due to the size of fire. If the product is in pressurized container, cool with water spray jet.
Unsuitable extinguishing media	During a fire, DO NOT extinguish by applying pressurized water and water jet directly on the burning product. Use water fog to cool down.
5.2. Special hazards arising from	om the substance or mixture
Specific hazards	This product is not explosive. Do not heat up near flash point.
Hazardous combustion products	In case of fire toxic and corrosive gases may form. These gases: Carbon dioxide, carbon monoxide, sulphur oxides, phosporus oxides, metal oxides
5.3. Advice for firefighters	

Protective actions during firefighting	In case of fire, shut off flow if it can be done without risk. Stop leak if safe to do so. Move undamaged containers from fire area if it can be done without risk. Prevent the burning product from entering into drainage system to avoid release of the product. To prevent spreading of the product build-up binders or barriers by using non-burning material such as sand. Use air-supplied respirators to protect against gases/fumes in case of fire-fighting.
Special protective equipment for firefighters	Fire-fighting should be done by trained personnel. Special protective full-clothing, air-supplied respirator, gloves and protective goggles should be worn. Dry chemical sand used for fire extinguishing and other fire extinguising equipment should meet the national and international standards.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsIn case of spills, beware of slippery floors and surfaces. Avoid inhalation of vapours and
contact with skin and eyes. Provide adequate ventilation. For personal protection, see Section
8. Do not smoke, use open fire or other sources of ignition. Wear protective gloves and (in
case of splashes) goggles/face shield too.

6.2. Environmental precautions

Environmental precautions Avoid release to the environment. Avoid discharge into drains,water courses or onto the ground. To prevent release,place container with damaged side up. Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to local appropriate regulatory body. Empty container contains product residue which may exhibit hazards of product.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Large Spillages: Stop leak if possible without risk. DO NOT touch spilled material! Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13. Avoid the spillage or runoff entering drains, sewers or watercourses. Inform authorities if large amounts are involved. Small Spillages: Stop leak if possible without risk. Dam and absorb spillage with sand,sawdust or other absorbent. Absorb in vermiculite, dry sand or earth and place into containers. Dispose of via an authorised person/licensed waste disposal contractor in accordance with local regulations.

6.4. Reference to other sections

Reference to other sectionsFor handling and storage, see section 7. For personal protection, see Section 8. See Section11 for additional information on health hazards. See Section 12 for additional information on
ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions	Provide adequate ventilation. Container must be kept tightly closed when not in use. Protect against direct sunlight. Do not heat up the product near flash point. Avoid spilling,skin and eye contact. Avoid eating,dringking and smoking when using the product. Persons susceptible to allergic reactions should not handle this product.
Advice on general occupational hygiene	Wash after use and before eating, smoking and using the toilet. Take off contaminated clothing and wash it before reuse.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautionsStore in a demarcated bunded area to prevent release to drains and/or watercourses. Store in
accordance with local regulations. Store in tightly-closed, original container in a dry, cool and
well-ventilated place. Protect from freezing and direct sunlight. Store in closed original
container at temperatures between 0°C and 50°C. Keep away from food, drink and animal
feeding stuffs.

. .

... ..

FULLGEAR HYP EP MT 90

Storage class Not special storage precautions required.

7.3. Specific end use(s)

Usage description

For containers or container linings, use mild steel or high density polyethylene (HDPE). For containers or container linings, avoid PVC. Polyethylene containers should not be exposed to high temperatures because of possible risk distortion.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Ingredient comments

No exposure limits known for ingredient(s).

8.2. Exposure controls

Protective equipment

Appropriate engineering controls	Provide adequate ventilation. Avoid innalation of vapours. In case of insufficient ventilation, wear suitable respiratory equipment. Observe any occupational exposure limits for the product or ingredients.
Personal protection	In case of splashing or scattering, wear protective oil-resistant or chemical-resistant clothing.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles or face shield.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. It is recommended that gloves are made of the following material: Nitrile rubber. It should be noted that liquid may penetrate the gloves. Frequent changes are recommended. Use thin cotton gloves inside the rubber gloves if allergy risk. The selection of suitable gloves does not only depend on the material, but also on further marks of quality varies from manufacturer. As the product is a pereparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
Other skin and body protection	Use skin protection cream for preventive skin protection. Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station. Do not smoke in work area. Wash hands after contact. Promptly remove non-impervious clothing that becomes contaminated. Contaminated clothing should be placed in a closed container for disposal or decontamination. Remove contaminated clothing and wash the skin thoroughly with soap and water after work. When using do not eat,drink or smoke.
Respiratory protection	If ventilation is inadequate, suitable respiratory protection must be worn. Wear a respirator fitted with the following cartridge: High-efficiency particulate filter.
Thermal hazards	Contact with hot product can cause serious thermal burns. If there is a risk of contact with hot product, all protective equipment worn should be suitable for use with high temperatures.

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance	Clear Liquid
Colour	Amber.
Odour	Mild, oily.
Flash point	220°C COC (Cleveland open cup).
Bulk density	0,916 kg/l @ 15°C
Solubility(ies)	Insoluble in water.
Partition coefficient	Not known.
Auto-ignition temperature	Not self-ignited
Viscosity	185,0 mm²/s @ 40°C 16,8 mm²/s @ 100°C
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
Comments	Values are typical. These values may be variable within the product specification.
9.2. Other information	
Other information	No information required.
SECTION 10: Stability and re	activity
SECTION 10: Stability and re 10.1. Reactivity	activity
-	activity No test data specifically related to reactivity available for this product or its ingredients.
10.1. Reactivity	
10.1. Reactivity Reactivity	
10.1. Reactivity Reactivity 10.2. Chemical stability	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Mixing with any other material.
10.1. Reactivity Reactivity 10.2. Chemical stability Stability	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Mixing with any other material.
10.1. Reactivity Reactivity 10.2. Chemical stability Stability 10.3. Possibility of hazardous Possibility of hazardous	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Mixing with any other material. reactions
10.1. Reactivity Reactivity 10.2. Chemical stability Stability 10.3. Possibility of hazardous Possibility of hazardous reactions	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Mixing with any other material. reactions
10.1. Reactivity Reactivity 10.2. Chemical stability Stability 10.3. Possibility of hazardous Possibility of hazardous reactions 10.4. Conditions to avoid	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Mixing with any other material. <u>reactions</u> No potentially hazardous reactions known. Avoid freezing. Avoid contact with strong oxidising agents. Avoid exposure to high
10.1. Reactivity Reactivity 10.2. Chemical stability Stability 10.3. Possibility of hazardous Possibility of hazardous reactions 10.4. Conditions to avoid Conditions to avoid	No test data specifically related to reactivity available for this product or its ingredients. Stable at normal ambient temperatures. Hazardous decomposition products	Does not decompose when used and stored as recommended. Heating may generate the following products: Toxic and corrosive gases or vapours. Thermal decomposition or combustion products may include the following substances: Carbondioxide,carbon monoxide,sulphur oxides,phosphorus oxides,metal oxides.
SECTION 11: Toxicological inf	formation
11.1. Information on toxicologi	cal effects
Toxicological effects	No data recorded.
Other health effects	No data available to indicate product or any components are carcinogenic,mutagenic,genotoxic,and chronic health hazards.
Skin corrosion/irritation Skin corrosion/irritation	Mevcut özel test verisi yoktur.
Serious eye damage/irritation Serious eye damage/irritation	No specific test data are available.
Respiratory sensitisation Respiratory sensitisation	No specific test data are available.
Skin sensitisation Skin sensitisation	May cause an allergic skin reaction.
Germ cell mutagenicity Genotoxicity - in vitro	No specific test data are available.
Carcinogenicity Carcinogenicity	No specific test data are available.
Reproductive toxicity Reproductive toxicity - fertility	No specific test data are available.
Reproductive toxicity - development	Mevcut özel test verisi yoktur.
Specific target organ toxicity -	single exposure
STOT - single exposure	No specific test data are available.
Specific target organ toxicity -	
STOT - repeated exposure	No specific test data are available.
Aspiration hazard Aspiration hazard	No specific test data are available
General information	Information given is based on a knowledge of the components and the toxicology of similar products.
Inhalation	Not expexted to cause irriation. Gas or vapour in high concentrations may irritate the respiratory system. Symptoms following overexposure may include the following: Coughing.
Ingestion	May cause discomfort if swallowed. The main symptoms are gastrointestinal ailments, including upset stomach.
Skin contact	May cause sensitisation by skin contact. Skin irritation should not occur when used as recommended.
Eye contact	Not expexted to cause eye irriation. Vapors formed from heating may cause eye irriation.

UN No. (ICAO)

3082

FULLGEAR HYP EP MT 90

Acute and chronic health hazards	The product contain special performance additives and mineral base oils which are considered to be severely refined and not considered to be carcinogenic. All of the base oils in the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract by the IP 346 test. USED OILS are more dangerous than new oils. Used oils may contain hazardous components which have the potential to cause skin cancer.
Route of entry	Inhalation,ingestion,skin,eye contact.
Target organs	Skin,eyes,respiratory system,lungs,gastro-intestinal tract.
SECTION 12: Ecological Infor	mation
Ecotoxicity	Toxic to aquatic life with long lasting effects.
12.1. Toxicity	
Toxicity	There is no specific test data available
12.2. Persistence and degrada	ability
Persistence and degradability	There are no data on the degradability of this product.
12.3. Bioaccumulative potentia	
Bioaccumulative potential	No data available on bioaccumulation.
Partition coefficient	Not known.
12.4. Mobility in soil	
Mobility	The product is insoluble in water and will spread on the water surface. It may absorbed by soil and will not be mobile.
12.5. Results of PBT and vPv	B assessment
Results of PBT and vPvB assessment	There is no specific test data available.
12.6. Other adverse effects	
Other adverse effects	Not known.
SECTION 13: Disposal consid	lerations
13.1. Waste treatment method	<u>ds</u>
General information	Empty packages and wastes produced after the usage of the product should be taken under control according to the current environmental regulations. Unless otherwise noted all wastes should be evaluated as hazardous waste.
Disposal methods	Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
Waste class	13 02 06*Synthetic engine, gear and lubricating oils 13 02 08*other engine, gear and lubricating oils
SECTION 14: Transport information	
14.1. UN number	
UN No. (ADR/RID)	3082
UN No. (IMDG)	3082

UN No. (ADN)	3082	
14.2. UN proper shipping name		
Proper shipping name (ADR/RID)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (CONTAINS Oleylamine; (Z)-octadec-9-enylamine, Reaksiyon ürünü, 4-metil-2-pentanol,difosfor pentasülfit, propoksilat, difosfor pentaoksit ile esterlenmiş, ve amin tuzları, C12-14 tert-alkil)	
Proper shipping name (IMDG)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (CONTAINS Oleylamine; (Z)-octadec-9-enylamine, Reaksiyon ürünü, 4-metil-2-pentanol,difosfor pentasülfit, propoksilat, difosfor pentaoksit ile esterlenmiş, ve amin tuzları, C12-14 tert-alkil)	
Proper shipping name (ICAO)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (CONTAINS Oleylamine; (Z)-octadec-9-enylamine, Reaksiyon ürünü, 4-metil-2-pentanol,difosfor pentasülfit, propoksilat, difosfor pentaoksit ile esterlenmiş, ve amin tuzları, C12-14 tert-alkil)	
Proper shipping name (ADN)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (CONTAINS Oleylamine; (Z)-octadec-9-enylamine, Reaksiyon ürünü, 4-metil-2-pentanol,difosfor pentasülfit, propoksilat, difosfor pentaoksit ile esterlenmiş, ve amin tuzları, C12-14 tert-alkil)	
14.3. Transport hazard class(es)		
ADR/RID class	9	

ADR/RID class	9

ADN packing group	
ICAO packing group	111

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant

14.6. Special precautions for user

EmS	F-A, S-F
ADR transport category	3
Emergency Action Code	•3Z

Hazard Identification Number 90 (ADR/RID)

Tunnel restriction code (E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislation	Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).
	Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
	December 2008 on classification, labelling and packaging of substances and mixtures (as amended).
	Observe the general safety regulations when handling chemicals. The product is not subject to identification regulations under EC Directives until 2004/73/EC (31. ATP) and the Ordinance on Hazardous Materials. The concentrations of the dangerous compounds, which are possibly specified under point 3, are not above the value for classification. Local regulations must be kept.

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

General information	All ingredients are listed in the European Inventories. However, they shall not constitute aguarantee for any specific product features and shall not establish a legally validcontractual relationship. This data sheet is a safety data sheet according to 91/155/EU. For products which are not subject to classification according to EU lists this data sheet is made on a voluntary base.
Key literature references and sources for data	December 13, 2014, No. 29204, "the Ministry of Environment and the Ministry of Urban Development Related to Safety Data Sheets on Hazardous Substances and Mixtures Direction"
Revision comments	Revised classification. Transport classification is revised.
